

EffortlessHome

SMART HOMES THAT ARE ACTUALLY SMART!

Current Landscape

Too many Apps and Subscriptions

Complicated usability causes inconvenience and fragmentation in smart home control across multiple platforms and multiple subscriptions

Data

Customer data and video are stored across multiple platforms, making it easier for hackers to gain unauthorized access to personal information

Functionality

Fragmented, multiple platforms, which may work individually but don't work together

Why go Effortless?

Whole Home Integration

Single connection, single app, single subscription. No additional add-ons, or subscriptions needed. Everything is conveniently managed in one place

Data Privacy

System and customer data is housed locally where only you can access via dedicated VPN tunnel, safely away from the cloud

Functionality and Convenience

A single connection for your entire home—no additional apps, add-ons, or subscriptions needed. Everything is conveniently managed in one place

What guests love

Automated climate control, lighting, and entertainment systems enhance the living experience.

Competitive advantage

Modern homes are embracing smart devices to elevate guest comfort. Our all-inclusive package gives you a competitive edge, ensuring your property stands out from the rest.

Safety is paramount

Guests value the assurance of state-of-the-art technology, making their stay both exceptional and secure.

Guest Comfort

and safety

Smart Thermostats

Optimize heating and cooling to save on energy bills

Home Automation Schedules

Automating electronics and appliances reduces standby power and overall energy use.

Energy Monitoring

Smart plugs and energy monitors provide real-time data on energy usage, allowing you to identify and reduce energy waste.

Energy Efficiency

and convenience

On an estimated \$1000/year home insurance policy, you can save up to \$450

FAQ

Security

How do we help protect
YOU

**What are you able to use
to oversee your home?**

Full HD cameras and human sensors with customizable security features around your home to monitor and capture any movement on your property

**How do you know your
windows and doors are
closed and secured?**

Smart locks with door and window sensors, notifying you if they are left open and allowing you to remotely lock and unlock

**How do we provide the
best data security?**

System and customer data is housed locally where only you can access via dedicated VPN tunnel, safely away from the cloud

Convenience

How do we help make
YOUR life easier

Where can I control my home from?

Enjoy complete control of your home from your computer or smartphone, complemented by a home control panel that integrates with your entire network.

How would I add new devices to my home network?

We offer the capability to transform some existing devices into a smart device by connecting it to our smart plug solution and customizing it to your preferences.

Can I grant others access to my home while restricting what they can see?

Remote access to your property is just the beginning. You can grant others access to your home, with specific controls, and set timeframes that you control.

Whole Home Integration

How do we connect
YOUR home

What does this mean?

A single connection for your entire home—no additional apps, add-ons, or subscriptions needed. Everything is conveniently managed in one place.

What are the benefits of having everything connected?

Pre-set lighting configurations. Integrated smoke alarms. Plus, you have full customization of your lights to suit any mood.

What else can I connect?

Total control of your Home Media, along with any other appliance or fans. We also offer comprehensive control of your homes pool

Control

What access do you
have to your home

What does this mean?

Custom time sensitive pins to enter the home, with the ability to grant certain access to cleaners, property managers, and residents without worry

Can I change my thermostat?

You can remotely control the temperature and customize access settings to restrict or grant specific temperature ranges to others.

What else can I control?

Smart valve water leak detection enables remote water supply shutoff. This alongside the ability to cut off any power and the homes water heater when needed allows you to secure your home in case of any emergency.
